

Iridium 9555

Satellite Phone

The Iridium 9555 gives you the freedom to stay connected where normal mobile phones don't work. Simply ensure you have a clear view of the sky and the satellites above, deploy the retractable antenna, dial the number, and press call. You can send and receive SMS, access your voicemail, store numbers in the phonebook and customise your phone settings, just like you would with a standard mobile phone.

Handset Features

- Compact design for portability
- Simple user interface
- Up to 30 hours standby time
- 4 hours talk time
- Integrated speaker phone
- SMS messaging capability
- Water, shock and dust resistant

Iridium 9555

Satellite Phone Accessories

Hands-free Vehicle Kit (Sold Separately)

The Pivotel IR-HF-9555 hands-free car kit provides hands-free communication for your Iridium 9555 handset. Equipped with an automatic stereo muting feature and car ignition connection, this is a ready-to-go in vehicle solution. With its cutting edge background noise filter and echo cancelling technology, the IR-HF-9555 hands-free car kit offers unmatched quality in satellite communication!

Includes

- 9555 docking cradle
- Hands-free microphone
- Hands-free speaker
- Electronics module
- Mini magnetic patch antenna with 1.5m coax tail
- RF phone inset
- Mini UHF to TNC connector
- 4.5m antenna cable

Also Available

- Optional privacy handset
- Optional whip antenna to mount on vehicle bull bar

Hands-free Desktop Dock (Sold Separately)

The Pivotel Desktop Dock for the Iridium 9555 is ideal for remote locations and portable site offices. It is efficiently designed to lay on a flat surface and blend into any professional environment or command centre. While in hands free mode it is great for conference calling, using the built in loudspeaker. The Desktop Dock provides the benefits of a fixed phone with a portability option! Since the dock is charging your satellite phone, you will have a fully charged phone ready to be used either at your command post or when you are out in the field.

Includes

- 9555 docking cradle
- Hands-free microphone
- Hands-free speaker
- Electronics module
- Privacy handset

Also Available

- Optional mini magnetic patch antenna with 1.5m coax tail
- Optional 4.5m antenna cable

StarPak (Sold Separately)

This water and dust proof rugged portable vehicle kit allows you to move your Iridium 9555 handset from vehicle to vehicle, or location to location, with all the benefits of a handsfree docking kit and privacy handset. The portable kit is in a Pelican hard case with carry handle that contains all the equipment and can also act as storage for your handset. It is simply connected via a DC charger socket and external attachment of the supplied magnetic antenna.

Includes

- 9555 docking cradle
- Hands-free microphone
- Hands-free speaker
- Electronics module
- Privacy handset
- Magnetic patch antenna and cable
- 12V DC car charger

Also Available

- Optional whip spring antenna to mount on vehicle bull bar
